

DATASHEET

COMPACT with touch-screen, is a user-controlled laser system with integrated laser and control electronics in a single compact package. The built-in touch screen display shows laser operating parameters, and enable easy and quick manual changes of laser operation conditions.

COMPACT touch screen allows the user to set the laser power, temperature, scan the laser power and modulate the laser using a built-in internal function generator up to 50KHz. External modulation is up to 1MHz depending on the wavelength/power combination.

COMPACT demonstrates excellent beam quality, power stability, temperature control, and low noise for demanding applications.

FEATURES

- ✓ USB Controlled

Operational Hazard of Laser Module

This laser module emits radiation that is visible/invisible and harmful to human eye. When in use, do not look directly into the laser emitting aperture. Direct viewing of laser diode emission at close range may cause eye damage.

Limited Warranty

One year. No warranty coverage for disassembly, modifications, or damage due to abuse or misapplication.
